EDUCATION

University of California, Berkeley

August 2025 - December 2027

Bachelor's in Cognitive Science, Bachelor's in Data Science

- Relevant Coursework: Computational Methods of Cognition, Data Structures & Algorithms, Discrete Mathematics & Probability, Data Science

EXPERIENCE

UC Berkeley Experimental Social Science Laboratory

June 2026 - Present

Research Assistant

- Build a pandas ETL pipeline (SQL extracts, joins, groupby aggregations) over 290K+ participant records, replacing manual reporting on MySQL and cutting recurring report turnaround 60%.
- Analyze a 12-year multi-channel acquisition data set to deliver data-driven recruitment strategies, increasing signups 20%
- Audit 2 pre-submission papers and their accompanying R scripts for data integrity, reproducibility, and methodology errors prior to submission, flagging 10+ discrepancies that could bias reported results.
- Oversaw execution of 5+ behavioral experiments (8,000+ participants), including scheduling and protocol compliance.

BARE Creative Magazine

Jan 2025 - Present

Web Director

- Iterate on Figma mockups across multiple design reviews, locking UI before production development.
- Lead a 5-person full-stack team (task assignment, code review, Git workflow), increasing site engagement by 25%.
- Architect a custom 3D page-flipping effect using React, recreating the experience of flipping through a magazine.

ASUC Senator Beardsley's Office

Sept 2025 - May 2026

University Student Affairs Representative

- Served as a liaison between students and university leadership, translating feedback from 21,500+ students into actionable insights that shaped discussions for actionable policy in regards to campus affairs.
- Collaborated with 3 ASUC senators and Residential Life to assess 200+ delayed housing offers, identifying systemic bottlenecks and presenting policy reforms projected to reduce transfer housing delays by 25%.
- Co-authored a 12-page policy report recommending that the ASUC Investment Fund allocate up to 5–10% of its sustainable investment portfolio toward nuclear energy ventures, aligning assets with campus climate goals.

Associated Students of Irvine Valley College

August 2024 - May 2025

Student Affairs Representative

- Designed survey instruments and collected 100+ responses to analyze behavioral trends in student study habits.
- Represented a 16,200+ student population as an elected representative, partnering with faculty, deans, and district administrators on data-backed policy recommendations.
- Authored and launched a peer-support program connecting 40+ students to structured study programs based on responses.

PROJECTS

Teta iOS Meditation & Alarm App | *React, Expo, EAS, AsyncStorage*

- Ideated and built a full iOS app that lets users pick a meditation the night before so one tap at the alarm starts it.
- Engineered an offline-first architecture from scratch: per-alarm audio data model, on-device file storage, and Async Storage.
- Beta tested with 5 users, iterated UX and alarm audio from feedback.

Movie-Genre Classifier | *Python, String Algorithms*

- Implemented a k-NN classifier on 5,000 word-frequency features from film dialogue, reaching 70% accuracy on test data.
- Selected k=15 through iterative comparison of candidate values, balancing bias against variance.
- Diagnosed misclassification patterns via systematic error analysis, guiding iterative feature reselection.

Computer Aided Typing Software | *Python, String Algorithms*

- Designed recursive algorithms to compare string similarity across large corpora for autocorrect suggestions.
- Evaluated algorithm performance across corpus size and edit-distance thresholds, balancing accuracy against speed.

TECHNICAL SKILLS

Languages & Tools: Python, R, SQL, MySQL, Java, C/C++, Git, Excel

Data Analysis: Pandas, NumPy, Polars, ETL Pipelines, Statistical Analysis, Data Visualization, Machine Learning

Frontend & Systems: React, Next.js, Blender, Git, Render, Vercel
